

Transfer powders and granules in tough conditions

Dust-free and contamination-free

Reliable conveying in tough conditions, extreme climates, and continual operations

Floveyor has been designing, engineering, and manufacturing conveyors and process line technology in Western Australia since 1958.

Original Floveyors are specially designed for the rapid, gentle transfer of powders, flakes, pellets, and granules for every type of mining and resources application.

Floveyor's engineering culture

Floveyor conveyors are engineered to the highest standards of availability and reliability.

Our focus is on keeping your plant operating at optimal efficiency with easy-clean machines that require minimal maintenance and very little downtime. Floveyors are designed for rapid but gentle conveying that can stand up to harsh environments and difficult materials.

Why choose an original Floveyor?

- Durable, reliable conveying machinery
- Requires minimal operational maintenance
- Total batch transfers, with negligible residue
- Homogeneous transfer of blended products
- Operates at any angle without diminishing throughputs
- ATEX 2014/34/EU suited for potentially explosive applications
- High availability, even with heavy use
- Conveys hazardous materials safely via a fully enclosed system
- Fast, easy cleaning with dry- and wet-clean options available
- Fully enclosed and modular installations
- High throughput with a small footprint
- Energy efficient conveying
- Integrates easily with existing plant and equipment.

FloDisc® Technology

Floveyor's proprietary FloDisc technology uses centrifugal force to suspend raw materials in an air pocket in an enclosed tube and propel them to a collection point. This provides a rapid but gentle way to safely transfer materials for mining and resources applications.

“Only Floveyors with FloDisc technology convey powders and granules so efficiently and safely.”

Process line technology for mining and resources powder handling

A vast range of accessories provides effortless integration to brownfield sites while meeting rigorous global compliance and safety standards for resources industry applications.

Mobile Conveyors

Tubular Drag Conveyor

Screw Feeder

Dosing Screw Feeder

FIBC Screw Feeder

Reusable FIBC Unloader

Loss-in-Weight Dosing Auger

Manual Bag Dump Station

Transit Loading

Disposable FIBC Unloader

Rotary Lump Breaker

Trough Screw Feeder
